TERF (Trans Exclusionary Radical Feminist) was a neutral term developed specifically to appease anti-trans extremists. We must start to name what they really are, and stop obscuring their hate behind neutral language. They certainly are not neutral, they are against our human rights.

Not only do they work to exclude us from public life, schools, health care, sexual violence services, womens' bathrooms, legal recognition, close our transgender youth suicide prevention services... ...but the anti-trans misinformation they create and spread contributes to fear, stigma, discrimination, and violence.

They are not feminists, but anti-trans extremists who cause great harm.
